

Equiscope®

Discover the Electro-Equiscope The Most Advanced Pain Management & Recovery Technology Available... the Results Speak for Themselves.

Fast, effective and drug-free. The Equiscope continually scans the body for low-conductivity (impedance) and autocorrects accordingly in milliseconds, delivering improved cell membrane function and mitochondrial energy (ATP) production.

Equiscope comfortably delivers intelligent micro-current through small plates or probes placed on affected areas, dermatomes, points, channels and meridians related to the problem or pathology. With each millisecond, it is working to harmonize the Autonomic Nervous System, bringing the body into rest and repair.

Other technologies like laser, ultrasound, PEMF and shock wave, are one directional and emit large amounts of energy. Using feedback from the body, Equiscope continually adjusts, and can do so accurately for human or veterinary use.

Commonly Achieved Benefits

- Optimized Performance
- Accelerated Recovery
- Increased Flexibility
- Improved Circulation
- Detoxification
- Increased Organic Energy
- Anti-Aging

Brain / Sleep

- Headaches & Migraines
- Traumatic Brain Injury
- Circulation
- Sleep (Disorders)

Pain / Sports Injury

- Joint & Ligament Injuries
- Soft Tissue Injuries
- Acute Sprains & Strains
- Muscle Pain & Burns
- Broken Bones
- Myofascial Pain

Chronic Pain Support

- Carpal Tunnel Syndrome
- Arthritis & Neuralgia
- Sciatica
- Disc Injuries
- TMJ & TMD

Wellness / Detoxification

- Inflammation & Swelling
- Lymphatic Support

Beauty

- Fine Lines
- Acne
- Keloid Scars
